Languages	:	Html 5, java script, C# .Net .
Tools Used	:	Visual Studio 2012, SQL Server2008.

Final Year Project :-

Name of Project	:	Utility for Product Billing using Barcode
Technology	:	MVC(Admin Panel) , Android Studio(User's side)
Database	:	MySQL

Overview :-

A System that consists of various products along with its stock name price and other data stored in the system. This system specializes in providing various functions including stock in, customer billing with bill calculation etc. The system is built to help shopping malls with the barcode system needed for fast bill calculation and stock maintenance. The system uses barcode to generate unique barcodes needed to identify newer products. On scanning, the product shows up in the system and its data is manipulated accordingly. The system provides a simple interface directly to the customer. The billing of the product can be achieved through this system. The customer database will be available to the shop vendors.

Other Skills :-

- Very good summarizing skill.
- Excellent in Interpersonal and decision making ability.
