· I have completed certification of Microsoft in "**Database Administration Fundamentals**" in year of 2013-14 of 6 months.

# Experience

I worked as Android Trainee Developer in Wexoz Technology, Pune. I completed my 6-month internship from Dec 2017 to June 2018 in above mentioned organization. I was actively involved in development of apps like **Taxpay** (POS system), **Taxpay Reports**, **Fleetroot**. All these apps are available on play store. I worked as team member in all above projects.

I worked on following projects during my internship in Wexoz Technology:

- **Taxpay**: It's a POS system developed for small retail shops. It gives a smooth & flawless experience of selling goods. Billing is so easy with this app. This app has both Mobile & Tab support. It also stores sales records & represent it with graphs.

- **Taxpay Report**: This app has reports of sales done by Taxpay app. It has many types of reports like sales, Tax, stock, etc.

## Educational projects:

I.    **Title**:  Medical Store Management system using C programming language. (M.C.A. Sem-I)

II.   **Title**: Blood Bank management system using C++ programing language. (M.C.A. Sem-II)

III.  **Title**: Health center management system Using .NET with C# language. (M.C.A. Sem-III)

IV.   **Title**: Quiz app developed using Android. (M.C.A. Sem-IV)

V.    **Title**: Face recognition with DIP (Digital Image Processing) using MATLAB. (M.C.A. Sem-V)

VI.   **Title**: **Invoice generating app developed using Android. (Internship project at Wexoz Technology, Pune during M.C.A. III Sem- VI)**

> This is Taxpay project as above described. It is a POS system developed for small retails store used for generating electronic bill. It also keeps records of sales and provide graphical representation of it. I worked in this project as group member.
